Forecast for Monday 27 Nov 2023

Weather: Low cloud and bands of rain and showers will push south and east through the morning with some heavier downpours. Rain likely turning to snow above about 600m, but becoming patchier through the afternoon with some clearer spells into the evening. Some showers continuing to feed in from northern coasts. A further fragmenting band of cloud, patchy rain and hill snow arriving overnight.

Chance of cloud-free hill tops above 800m: 20%, improving across central and southern areas to 70% by mid-afternoon. Lowering to 20% more widely towards midnight.

Low Cloud and visibility: Areas of broken cloud base 500-700m this morning, lowering to around 400m towards the northwest including the Carneddau loop. Higher routes in the north of the park likely remaining obscured throughout. Cloud breaks developing widely towards Dolgellau, where few or scattered bases around 700-800m from mid-afternoon. Bases lowering again from the north towards midnight to around 500m. Visibility moderate in rain or showers, poor or very poor in heavy rain and snow. Visibility good outside of cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling very cold at height given the strong northerly breeze and wintry showers. Feeling especially cold later in the day and overnight with a marked wind chill. Be prepared with appropriate layers.

Forecast for Tuesday 28 Nov 2023

Weather: A fragmenting band of showery rain will continue to sink southwards across Wales early Tuesday bringing cloudy conditions until mid-morning and the odd spot of rain and drizzle, and some wintriness on higher peaks. Isolated mist and fog patches in some valleys mostly clearing by mid-morning. Then becoming dry and bright with prolonged sunny spells for much of the day.

Maximum wind: Northerly 15-20mph, gusting 20-30mph at first, becoming light and variable through the morning.

Chance of cloud-free hill tops above 800m: 30%, improving from the north to 90% by mid-morning.

Low Cloud and visibility: Scattered or broken cloud with bases around 600m, breaking and clearing by mid-morning to be above tops. Valley fog lifting and clearing, giving patchy cloud cover on slopes as it dissipates. Visibility poor or very poor in any mist and fog or wintry showers, moderate in patchy rain, becoming excellent with clear views of distant hills.

Temperature: **Valleys:** Plus 2 to plus 6 Celsius
At 800m: Minus 2 to plus 1 Celsius
Freezing level: 800-1000m, falling to 600m later
